Research interests

Statistical machine learning, speech synthesis, voice conversion, and human computation.

Education and research experience

Education

- **Ph.D. degree in Information Science and Technology**
Graduate School of Information Science and Technology, The University of Tokyo, Japan. 2021
- **M.S. degree in Information Science and Technology**
Graduate School of Information Science and Technology, The University of Tokyo, Japan. 2018
- **B.S. degree in Engineering**
National Institution for Academic Degrees and Quality Enhancement of Higher Education, Japan 2016

Research experience

- **Project Research Associate**
Graduate School of Information Science and Technology, The University of Tokyo, Japan. 2021–**current**
I work on research and development on acoustic information processing and voice conversion.
- **Research Assistant**
The University of Tokyo, Japan. 2019–2021
I worked on research and development on stress-free, real-time, and full-band voice conversion based on perceptual models.
- **Part-time Researcher**
DeNA Co., Ltd., Japan. 2019–2021
I worked on research and development on many-to-one voice conversion technology.
- **Research Fellow (DC1)**
Japan Society of the Promotion of Science (JSPS), Japan. 2018–2021
I worked on research and development on speech synthesis based on statistical modeling of human perception.
- **Research Intern**
NTT Media Intelligence Laboratories, NTT Corporation, Japan. 2017
I worked on research and development on non-parallel voice conversion technology.
- **Research Intern**
NTT Communication Science Laboratories, NTT Corporation, Japan. 2016
I worked on research and development on native-nonnative voice conversion technology.

Languages

Japanese (native) and English (conversant)

Competitive funds

- **Research and Development on Automatic Audio Commentary Generation on Gameplay Videos**
Grant-in-Aid for Young Scientists, JSPS (research representative), \$25,900. 2023–2025
- **Research and Development on Sustainable Speech Synthesis Technology based on Continual Learning**
Grant-in-Aid for Research Activity Start-up, JSPS (research representative), \$15,800. 2021–2023
- **Active Speech Synthesis based on Listener Perceptual Modeling**
Grant-in-Aid for JSPS Fellows, JSPS (research representative), \$17,300. 2018–2021
- + 3 fund since 2018

Teaching experience

- **Advanced Signal Processing (Invited Guest Presenter)**
Graduate School of Information Science and Technology, The University of Tokyo, Japan. 2022
I lectured recent development of deep-learning-based speech synthesis technologies. (in Japanese)
- **Applied Gaussian Process and Machine Learning (Invited Guest Presenter)**
Graduate School of Information Science and Technology, The University of Tokyo, Japan. 2021
I lectured fundamentals of generative adversarial network-based statistical speech synthesis technologies. (in Japanese)

Project Practice (Teaching Assistant)

Department of Mathematical engineering and information physics, The University of Tokyo, Japan.

2016–2017

I lectured how to build audio-based interaction systems. (in Japanese)
